

ACULEO  
**BUZZHERO™**  
BEE & WASP REPELLENT

## ENJOY YOUR SPACE WITHOUT THE BUZZ.

**Aculeo BuzzHero™** is a science-based, eco-conscious solution for managing nuisance water-foraging honey bees and wasps. Applied to hard surfaces around pools and water features where bees and wasps land, it disrupts nuisance foraging behavior, encouraging a shift to alternative water sources and drastically reducing activity in the treated area.

**Aculeo BuzzHero™** is formulated with plant-based oils including lemongrass, rosemary, and peppermint to dramatically reduce nuisance water-foraging activity around pools and water features without the use of harsh, broad-spectrum pesticides. Apply 30 minutes before swimming and reapply every hour while in the water for best results.

## KEY BENEFITS

- **REDUCES** sting risk around **pools and water features**
- **LIMITS** negative impact on honey bees and wasps through behavior-based management
- **ENCOURAGES** bees and wasps to shift to alternative water sources
- **USES** plant-based ingredients without harsh, broad-spectrum pesticides
- **SAFE** to use around pools and outdoor spaces where people and pets are present
- **HELPS** maintain safer outdoor environments

## ADDITIONAL APPLICATIONS

- Works in **trash areas** to reduce nuisance sugar-foraging activity around guest spaces
- Works along **building edges** to reduce unwanted landing and early nesting activity

**DO NOT USE ON ANY WATER FEATURE THAT CONTAINS AQUATIC LIFE. DO NOT APPLY DIRECTLY TO WATER. APPLY TO EXTERIOR SURFACES ONLY.**

Through behavior-based solutions, Aculeo drastically reduces dangerous interactions between humans and certain stinging insects, honoring its mission to Protect the Human and the Hive.
