BuzzBox™

BuzzHero™

WATER SOURCE DETERRENT

BuzzHero™ is Aculeo's botanical spray that deters bees and wasps from pools, spas, and water features. Safe for people, pets, and pollinators, it uses plant-derived scents to discourage foraging activity near water features — without overuse of chemicals or unnecessary harm to pollinators.

BuzzBeacon™

PRECISION PHEROMONES

BuzzBeacon™ is the industry's most effective pheromone lure, powering BuzzBox™ and ScoutStop.™ Its unparalleled formulation draws in nuisance foragers and scout bees, allowing the devices to keep outdoor spaces clear and prevent new infestations without traditional harsh pesticides.

BuzzBox™

FORAGING BEE SUPPRESSION

The Aculeo BuzzBox™ system stops foraging bees by disrupting the chemical signaling honey bees use to recruit additional foragers to sugar-rich food sources. This means a significant reduction in nuisance bees at restaurants, drink stands, patios & event spaces. All without harming the colony.

ScoutStop™

INFESTATION PREVENTION

Before a bee swarm chooses a new nesting location, scout bees survey the area. This trap intercepts scout bees before they can identify your property as a possible nest site, thereby dramatically reducing the chance of structural infestations.

PROTECTING THE HUMAN AND THE HIVE

Choosing between safety and sustainability shouldn't be a requirement. Biology-based products work by interrupting the natural behavior patterns honey bees use to locate water, food, and new nesting sites, reducing the chances they become a problem in the first place. No colony destruction. No unnecessary chemicals.

EACH PRODUCT PLAYS A UNIQUE ROLE IN
DISRUPTING NUISANCE HONEY BEE & WASP
BEHAVIOR SAFELY AND EFFECTIVELY
