

STOP INFESTATIONS BEFORE THEY START.

The Aculeo ScoutStop™ is a modern, discreet device designed to work seamlessly with BuzzBeacon™ to intercept scout honey bees during the early stages of nesting site selection. By preventing scouts from returning to the swarm to communicate viable nesting locations, ScoutStop™ significantly reduces the likelihood of structural infestations. Its low-profile design integrates naturally into residential and commercial environments without drawing attention.

HOW IT WORKS:

1.
A SWARM SEARCHES
FOR A NEW HOME

2.
THE SWARM SENDS
OUT SCOUTS

3.
SCOUTSTOP™
INTERCEPTS THOSE
SCOUTS

4.
INTERCEPTED SCOUTS
NEVER RELAY LOCATION
INFORMATION

5.
THE SWARM
MOVES ON

KEY FEATURES:

- **Low-Profile Design**
Integrates into residential and commercial environments.
- **Strategic Placement**
Installs at common scout entry and evaluation points.
- **Responsible Approach**
Protects people while reducing unnecessary swarm loss.
- **System Integration**
Works with BuzzBeacon™ to deliver consistent performance.

IDEAL FOR:

- Pest Control Operators (PCOs)
- Facility & Property Managers
- Homeowners in High-Risk Areas
- Schools and Campuses
- Warehouses
- Hotels & Resorts
- Retail & Dining Properties

Each ScoutStop™ kit comes with two 8.5" x 5.25" glue boards and two three-month BuzzBeacon™ lures. Additional boards and lures can be purchased from any of our distributing partners.
